June 2020

WE MADE IT! Summer is FINALLY here! We are starting to see a more normal day here at First School, and have a lot of familiar faces returning! This summer will be one to remember for the students.

In May we learned all about different modes of transportation, and which one takes us where. We even got to take a fun ride on the bus! We learned some bus safety, and practiced a few drills just in case they are needed. The students loved talking about their different cars, and which mode of transportation was their favorite.

For the remainder of May we took a journey to the galaxy! We learned all about the different planets, what a constellation is, and how we get to space. We learned about different creatures in space, and which planets there is life on. We even made our own solar system! The students loved coloring a planet and putting them in order. They all started with a single planet and then put them together to create a bigger picture. Kind of like how our solar system is!

The beginning of June will be a continuation of our Solar System. We will focus on bigger projects, and learn how to follow directions to complete a few experiments. I am hoping the weather stays nice out for us to get some fresh air and not be cooped up.

The remainder of June will be spent preparing for summer. We will start our water days, and we will review how to take care of our outdoor playground. Our theme will be all things summer. We have a few new toys for the summer to play with and with that comes the responsibility of knowing how to take care of it, and how to take turns. I am looking forward to the fun things we have planned this summer with your children!

Since we will be starting water days in June, I will send out an email asking for sunscreen and inform you of our water days. For these we ask you to bring a bag with a towel, a swimsuit, an extra pair of clothes (just in case), and sunscreen. We will label the sunscreen and leave it here in the classroom. Each child will have their own, that only they will be using.

If you have any questions, please feel free to email either Ms. Griffiths, we will be happy to answer any and all questions you may have. I am looking forward to spending this time with your children, and I hope through all the chaos of our world, this brings a little normalcy to your child's life!

Ms. Amy Griffiths and Ms. Anne Griffiths
