

## Consent for Topicals & IPM

### Chap stick Agreement:

Students may have chapstick to be applied during the day. Parents need to clearly label tube or container with first and last name of child.

### Sunsreen Agreement:

Students will need to have sunscreen applied before going outside. Parents need to clearly label container or tube with first and last name of child.

### Diaper Cream Agreement:

For younger students needing to have diaper cream applied we ask that parents inform teachers the necessary instructions needed. Also parents need to clearly label container or tube with first and last name.

The signature below indicates that the person signing has read and has given consent to all of the above unless noted by circling and initialing specific agreement.

Student's Names: \_\_\_\_\_

Parent's Signature: \_\_\_\_\_

**Pest Management:** First School has in place an Integrated Pest Management plan for the protection of your children. Our goal is to prevent insect and animal pests from becoming an issue inside our school and to eliminate or reduce the use of pesticides. First School shall notify all parents or guardians before a pesticide application. Also we will maintain a registry of parents or guardians who wish to receive written notification to them. Notification of the intended date of the application of the pesticide will be posted on First School's Parent Board and will be given at least 2 days before the pesticide application.
